

EnergyPLAN Newsletter no. 19

January 2020

Dear colleague and EnergyPLAN user,

You receive this e-mail because you have once registered as a user of the EnergyPLAN computer model. We issue newsletters once or twice a year. If you do not wish to receive future newsletters, please send an e-mail to energyplanmodel@gmail.com.

EnergyPLAN 15.0 release note

EnergyPLAN 15.0 has been released. The new version includes the following new features:

- An additional electricity demand can be added.
- Ammonia for transport can be modelled.
- The CO₂ hydrogenation unit now enables an even more flexible use, by activating a new regulation strategy.
- A second electricity storage has been added.
- The thermal storages have been given more operation options. You can switch between the old operation and a new that allows the storage to operate seasonally and with the inclusion of excess heat from electric boilers.

Do you want to know more about how to apply EnergyPLAN to your work?

On **20-22 April 2020** and **4-6 May 2020**, Aalborg University hosts its annual EnergyPLAN PhD course. The course has been conducted every year since 2005 with great success. It gives an introduction to advanced energy system analysis using the EnergyPLAN computer tool and model.

The course is a combination of lectures and computer workshops of a total of 5 days (40 hours) and assignments of a total of 6-7 days (52 hours) and has a workload of 3 ECTS.

The deadline for registration is **10 April 2020**.

Do you use EnergyPLAN in teaching?

We know that EnergyPLAN is used by teachers around the world - and we would like our website to show examples of use from the EnergyPLAN community.

If you teach or host a workshop applying EnergyPLAN, please share your experience with us by sending us a brief description at energyplanmodel@gmail.com.

6th International Conference on Smart Energy Systems - Save the date!

It is time to mark your calendar! On 6-7 October 2020, the 6th International Conference on Smart Energy Systems takes place in Aalborg, Denmark.

The 6th conference in the series cements it as a main venue for presentations and fruitful debates on Smart Energy Systems, 4th generation district heating, electrification, electrofuels and energy efficiency.

The conference venue is a former power station, now converted into a modern centre for conferences, sports and music. Conference and dinner venues and hotels are all located within walking distance by Aalborg's waterfront.
